

I've learned of the effort by the NAB to prevent satellite radio from providing me with the variety I want to include local content. I'm disturbed that an industry tries to stifle competition by having government regulate it in this fashion.

This is Pay-Radio; I pay for the content. It is so much better than the typical AM/FM radio that I am willing to PAY for it compared to the FREE radio which, as far as I'm concerned, they can't give it away to me.

Also, please note that my satellite radio has a blocking service which I can use to block any of the channels if I feel the content is too mature for young listeners.

I urge you to deny the NAB's petition/request which seeks protection from this wonderful service.

Thank you for "listening".

Randall Norton
